Project

Field(s) Cultural – music . organ

Description Establishment of an organ heritage network between Portugal, Spain and France with the aim of publicizing the baroque organ through: guided tours of the instruments, leaflet edition with history and characteristics of the visited organs and construction of a website about the baroque organ.

Partners searched

Countries Spain; France

Profile Cultural Organizations concerning the organ heritage especially those that have developed activities to safeguard the baroque organ. This category of musical instrument exists in churches of Spain and in France .

Other

... A.C.E.R. developed an inventory of the organistic heritage of Oporto and North of Portugal, with an accent on the baroque organ. From this work there is a set of characterizing notes (organ builder's name, date, history, restoration / conservation interventions, and technical analysis) and a collection of thousands of digital images of the instruments. Guided visits were organized, conducted by a master organist, to baroque organs located in the churches of Oporto. Some of the contents of the A.C.E.R. heritage projects are shown on www.acer-pt.org ("Projectos" section), and organs are particularized on sub-site www.orgaos.acer-pt.org
